

## ELMHURST HAS ASSISTANCE FOR INSTALLING DUCTLESS HEAT PUMPS

Elmhurst Mutual offers assistance for its single family home customers with electric resistance heat if they choose to upgrade their heating system and install a ductless heat pump.

The Ductless Heat Pump program helps reduce residential customers heating costs and improve their homes. Electric heating costs can be reduced by 25% to 50% plus customers receive the added bonus of air conditioning.

- Homes (site built or manufactured) with electric baseboard, wall heaters or ceiling cable – Incentive of **\$800**.
- Homes (site built or manufactured) with forced air electric furnaces – Incentive of **\$1,000**.

Trained Ductless Heat Pump contractors (Northwest Going Ductless Program Contractors) install the systems and are listed on the Going Ductless web site.
